

Microsoft Azure ROADMAP

Step-by-Step Guide to Become an Azure Cloud Professional

LEARN

PRACTICE

BUILD

CERTIFY

GROW

1

1. Cloud & Azure Fundamentals

- What is Cloud Computing?
- Benefits of Cloud, Deployment Models (IaaS, PaaS, SaaS)
- Azure Core Services Overview
- Azure Regions, Availability Zones, Resource Manager

Duration

1-2 Weeks

Resources

Microsoft Learn, Docs

2

2. Azure Account & Portal Basics

- Create Azure Free Account
- Azure Portal Overview
- Resource Groups, Management Groups
- Billing, Subscriptions, Azure Support

Duration

1 Week

Resources

Microsoft Learn

3

3. Compute Services

- Virtual Machines (Windows & Linux)
- VM Scale Sets, Availability Sets
- Azure App Service, Azure Functions
- Containers: Azure Container Instances (ACI)

Duration

2-3 Weeks

Resources

Microsoft Learn, Docs, Hands-on

4

4. Storage Services

- Azure Storage Accounts
- Blob Storage, File Storage, Queue, Table
- Azure Disks, Snapshots
- Backup, Azure Data Lake Storage Gen2

Duration

1-2 Weeks

Resources

Microsoft Learn

5

5. Networking

- Virtual Network (VNet)
- Subnets, NSG, Route Tables
- Load Balancer, Application Gateway
- VPN Gateway, ExpressRoute, DNS

Duration

2-3 Weeks

Resources

Microsoft Learn, Docs

6

6. Identity, Security & Compliance

- Azure Active Directory (AAD)
- Users, Groups, Roles, RBAC
- Multi-Factor Authentication (MFA)
- Azure Policy, Blueprints, Security Center

Duration

2 Weeks

Resources

Microsoft Learn, Docs

7

7. Databases

- Azure SQL Database
- Azure Database for MySQL, PostgreSQL
- Cosmos DB, Table Storage
- Data Migration Services

Duration

2 Weeks

Resources

Microsoft Learn, Docs

8

8. Monitoring & Management

- Azure Monitor, Metrics, Logs
- Log Analytics, Alerts, Action Groups
- Application Insights
- Azure Advisor

Duration

1-2 Weeks

Resources

Microsoft Learn

9

9. DevOps on Azure

- Azure DevOps Services Overview
- Repos, Pipelines (CI/CD)
- Artifacts, Boards
- Infrastructure as Code (ARM Templates, Bicep, Terraform)

Duration

2-3 Weeks

Resources

Microsoft Learn, Docs, Labs

10

10. Azure Architecture & Best Practices

- Well-Architected Framework
- High Availability, Scalability
- Cost Optimization
- Naming, Tagging, Resource Organization

Duration

2 Weeks

Resources

Microsoft Learn, Docs

11

11. Advanced Services (Profound but Recommended)

- Azure Functions (Advanced)
- Azure Kubernetes Service (AKS)
- Azure API Management
- Azure Service Bus, Event Hubs, Stream Analytics
- Azure AI Services, Cognitive Services

Duration

3-4 Weeks

Resources

Microsoft Learn, Docs

12

12. Certification & Career Growth

- AZ-900 (Fundamentals)
- AZ-104 (Administrator)
- AZ-305 (Solutions Architect Expert)
- Keep Learning & Work on Real Projects

Duration

Ongoing

Resources

Microsoft Learn, Practice Exams

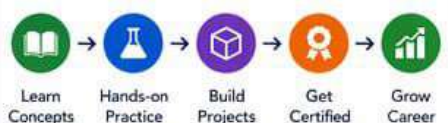

ESSENTIAL SKILLS

- Cloud Computing Concepts
- Problem Solving
- Networking Basics
- Windows & Linux Basics
- Security Best Practices
- Scripting (PowerShell / CLI)
- Automation & DevOps Mindset

IMPORTANT AZURE SERVICES

- Virtual Machines
- App Service
- Functions
- Storage Account
- Azure SQL Database
- Azure Cosmos DB
- Virtual Network
- Load Balancer
- Azure Active Directory
- Monitor
- Key Vault
- Azure Backup
- Azure DevOps
- Application Gateway
- Azure Kubernetes Service (AKS)
- Azure Data Factory
- Service Bus
- Event Hubs
- Logic Apps

LEARNING PATH FLOW

BEST PRACTICES

- ✓ Start with Fundamentals and build strong basics
- ✓ Use Azure Free Tier for Hands-on
- ✓ Follow Microsoft Learn Paths
- ✓ Work on Real-world Projects
- ✓ Join Azure Community & Stay Updated
- ✓ Automate Everything
- ✓ Document & Share Your Learnings

CAREER OPPORTUNITIES

- Cloud Engineer
- Azure Administrator
- Solutions Architect
- DevOps Engineer
- Cloud Security Engineer
- Site Reliability Engineer

Consistency + Practice + Projects = Azure Mastery
Keep Learning. Keep Building. Keep Growing!
