

AWS ROADMAP

Step by Step to Become an AWS Cloud Practitioner

Learn > Practice > Build > Grow

1

1. Cloud & AWS Fundamentals

- What is Cloud Computing?
- Cloud Concepts: IaaS, PaaS, SaaS
- AWS Global Infrastructure
- AWS Pricing & Shared Responsibility Model

🕒 1 Week

OUTCOME

Understand cloud fundamentals and AWS core concepts.

2

2. AWS Core Services

- Compute: EC2, Auto Scaling, Elastic Beanstalk
- Storage: S3, EBS, EFS, Glacier
- Database: RDS, DynamoDB
- Networking: VPC, Subnet, Route 53, CloudFront

🕒 1–2 Weeks

OUTCOME

Learn key AWS services and how they work together.

3

3. Security & Identity

- IAM (Users, Groups, Roles, Policies)
- Security Best Practices
- Security Services: Security Group, NACL, KMS, ACM
- AWS Shield, Firewall Manager (Basics)

🕒 1 Week

OUTCOME

Secure your AWS resources and applications.

4

4. Storage & Databases Deep Dive

- S3 Advanced (Lifecycle, Versioning, Replication)
- EBS vs EFS
- RDS (Multi-AZ, Backups, Read Replicas)
- DynamoDB (Basics)

🕒 1–2 Weeks

OUTCOME

Store, manage and protect data in the cloud.

5

5. Networking Deep Dive

- VPC Deep Dive (Public/Private Subnet, NAT)
- Internet Gateway, Route Tables
- Load Balancer (ALB, NLB)
- DNS with Route 53, CloudFront (CDN)

🕒 1–2 Weeks

OUTCOME

Build scalable and highly available network architectures.

6

6. Compute & Application Services

- Auto Scaling Groups
- Elastic Beanstalk
- Lambda (Serverless Basics)
- Elastic Container Service (ECS Basics)

🕒 1–2 Weeks

OUTCOME

Run and scale applications efficiently using AWS compute services.

7

7. Monitoring & Management

- CloudWatch (Metrics, Alarms, Dashboards)
- AWS CloudTrail
- AWS Config
- Trusted Advisor

🕒 1 Week

OUTCOME

Monitor, log and manage your AWS environment effectively.

8

8. Billing, Pricing & Support

- AWS Pricing Models
- Cost Explorer, Budgets, Cost Optimization
- AWS Support Plans

🕒 3–5 Days

OUTCOME

Optimize costs and choose the right support plan.

9

9. DevOps & Automation (Basics)

- AWS CloudFormation (IaC Basics)
- AWS CLI & SDK (Basics)
- CodeCommit, CodeBuild, CodeDeploy (Overview)

🕒 1–2 Weeks

OUTCOME

Automate deployments and manage infrastructure as code.

10

10. Practice & Certification

- Hands-on Projects
- Review & Prepare for AWS Certified Cloud Practitioner (CLF-C02)
- Take the Exam and Get Certified!

🕒 2–3 Weeks

OUTCOME

Build real-world projects and get AWS Cloud Practitioner certified.

RECOMMENDED LEARNING RESOURCES

- 🎓 AWS Skill Builder (Free Tier)
- 📖 AWS Documentation
- 📺 YouTube (AWS Official Channel)
- 📺 A Cloud Guru / Udemy
- 🔧 Practice with Free Tier

HANDS-ON PROJECT IDEAS

- ✓ Host a Static Website on S3
- ✓ Deploy a Web App on EC2
- ✓ Build a 3-Tier Architecture
- ✓ Set up a VPC with Public & Private Subnets
- ✓ Create a Serverless App with Lambda + API Gateway

TIPS FOR SUCCESS

- ✓ Learn by Doing
- ✓ Build Small, Think Big
- ✓ Follow AWS Well-Architected Principles
- ✓ Practice Regularly
- ✓ Stay Consistent & Keep Building

Cloud is the future. Start today, stay consistent, and grow with AWS!
