

React

REACT ROADMAP

Step by Step to Become a React Developer

Learn → Build → Practice → Grow

1

1. JavaScript Fundamentals

- ES6+ (let, const, arrow functions, template literals)
- Data types, operators, loops, functions
- DOM Manipulation
- Async JavaScript (Promises, Async/Await)

🕒 1-2 Weeks

OUTCOME

Strong JavaScript foundation to build React applications.

2

2. React Basics

- What is React?
- JSX Basics
- Components (Functional Components)
- Props

🕒 1-2 Weeks

OUTCOME

Build and understand basic React components.

3

3. State & Events

- useState Hook
- Handling Events
- Controlled Components
- Conditional Rendering

🕒 1-2 Weeks

OUTCOME

Manage data and user interactions in your React apps.

4

4. React Router

- React Router DOM
- Routes & Links
- Nested Routes
- Navigation & Redirects

🕒 1 Week

OUTCOME

Navigate between pages and build multi-page apps.

5

5. State Management

- useContext Hook
- Context API
- (Optional) Redux Toolkit / Zustand (Basics)
- When to use which?

🕒 1-2 Weeks

OUTCOME

Manage global state efficiently in large applications.

6

6. Side Effects & Data Fetching

- useEffect Hook
- Fetching API Data
- Axios / Fetch API
- Loading, Error & Empty States

🕒 1-2 Weeks

OUTCOME

Fetch and manage data like a real-world application.

7

7. Forms & Validation

- Controlled vs Uncontrolled Components
- Form Handling
- Form Validation (Formik / React Hook Form)

🕒 1 Week

OUTCOME

Build forms with validation in React applications.

8

8. Performance Optimization

- React.memo
- useMemo & useCallback
- Lazy Loading (React.lazy & Suspense)
- Code Splitting

🕒 1 Week

OUTCOME

Optimize performance and build fast applications.

9

9. Testing

- Unit Testing with Jest
- React Testing Library
- Testing Components & User Interactions

🕒 1 Week

OUTCOME

Write tests and build reliable, bug-free applications.

10

10. Projects & Deployment

- Build Real-world Projects
- Deploy to Vercel / Netlify
- Environment Variables
- Best Practices & Folder Structure

🕒 2-3 Weeks

OUTCOME

Deploy production-ready apps and build your portfolio.

TOOLS YOU SHOULD KNOW

VS Code

Git & GitTools

NPM

Chrome DevTools

PROJECT IDEAS

- ✓ To-Do App
- ✓ E-commerce Website
- ✓ Blog / CMS App
- ✓ Weather App
- ✓ Movie Search App

TIPS FOR SUCCESS

- ✓ Practice every day
- ✓ Build projects
- ✓ Read documentation
- ✓ Follow React community
- ✓ Stay consistent & keep learning

★ Consistency is the key! Keep learning, keep building, and enjoy the journey. 🚀
